You mean this original 5-page “summary” from OAQPS on the options?

I also had prepared some comments on the options and recommended R5’s positions, but those are moot now because they were either incorporated or ignored in the final rule. It is really not worth re-opening any discussions because we only risk making the rule worse.

I think you’re good to respond to Mike with this, but provide all of the original info to him.

The original Options Selection meeting for this rule already occurred in June. The final rule was about to go to OMB but Anne Idsal asked for a “re-do” of Options Selection (even though she attended the original OS meeting).

The workgroup team is pretty much in the dark about why this is happening. The message to us is that Anne wants to better understand the options presented and chosen. The workgroup leads are going to present the same info that was presented at the June meeting, and none of the workgroup members are preparing anything for the meeting, since we already presented our positions in June. We don’t know if the outcome of this meeting will be that the final rule will continue on its way to OMB or if we will be asked to choose another option(s) and rewrite the rule.

Let me know if you want me to send this explanation to Mike or if you have a better way of explaining it.

Natalie

Attached and below is the Options Selection for Oil and Natural Gas NSPS Technical Reconsideration (Tier 2, SAN 5719.8) meeting invitation scheduled on October 2, 2019 at 9 am (CT).

I'm sure you probably have this covered, but as a precaution we routinely ask the involved division(s) the following:

- Has Cathy Stepp been briefed on this action and do you know and understand her position?
- Are you planning on briefing Cathy before this meeting?
- Do you know if Cathy is planning to attend?
- If Cathy will not be attending has someone been delegated by her to put forward the R5 position?

Please let me know.

Thanks,
Mayra
